If you choose to access APCIRCUIT using your mobile device or other remote location, you will need a supportable mobile device including a cellular phone or other mobile device that is web-enabled and allows secure single socket layer (SSL) encryption (128 bit) traffic which is also capable of receiving text messages. Your wireless carrier may assess you fees for data or text messaging services. Please consult your wireless plan or provider for details.

Security Safeguards. For the protection of our members' confidential data, we employ several forms of security including:

- **Dual Password Protection** – each Member user must enter their Account number and an 8 – 20 character password each time they log in to APCIRCUIT.
- **Multifactor Authentication (MFA)** – this feature helps to keep your information secure and helps protect your information from fraud and identity theft. Every time you log in to APCIRCUIT, the Credit Union identifies you, and allows you to identify the Credit Union by displaying your previously selected unique Security Image;
- **Data Encryption** – this feature modifies the information which is sent from our server to your browser in a code that cannot be translated or altered without key information from our server. The URL or web address should begin as follows: <https://www.netteller.com>; and
- **Network Security** – Our APCIRCUIT server allows access from the Internet to member Account information by running programs that communicate with the Credit Union's main server. Your Account information and unique Security Image are not stored on the APCIRCUIT server.

Notwithstanding the foregoing, you acknowledge and agree that APCI FCU cannot guarantee the security of any such data. TO THE EXTENT PERMISSIBLE UNDER APPLICABLE LAW, WE DISCLAIM ALL WARRANTIES OF ANY KIND, WHETHER EXPRESS OR IMPLIED, REGARDING THE SECURITY OF ANY CONFIDENTIAL DATA STORED, TRANSMITTED OR ACCESSED IN CONNECTION WITH THE SERVICE.
